# Calibration Solutions for Industrial Temperature Sensors

## 4000 Series

**Portable Dry Blocks, Liquid Baths and  
Multi-functional Heat Sources**

# Contents

<b>A Guide to the three versions - Basic, Site &amp; Advanced</b> .....	4 - 5
<b>Introducing the 4000 Series</b> .....	6 - 9
Hyperion and Drago           -25°C to 250°C      65mm Calibration Volume .....	10 - 13
Europa, Venus and Calisto   -45°C to 250°C      35mm Calibration Volume .....	14 - 17
<b>A Guide to Portable Calibration</b> .....	18 - 19
Jupiter                        35°C to 660°C      35mm Calibration Volume .....	20 - 23
Gemini                         35°C to 700°C      65mm Calibration Volume .....	24 - 27
Pegasus                       150°C to 1200°C    33.5mm Calibration Volume .....	28 - 31

## Isotech Innovation

**We have been providing calibration solutions for more than 35 years, from Primary Standards for National Metrology Institutes through to handheld calibrators for service engineers.**

Our portable calibrators have set a number of world firsts, the first Dry Blocks to feature an independent inbuilt temperate indicator and the first Dry Blocks to reach -100°C. The award winning ISOCAL-6 was the first calibrator to offer both Dry Block and Liquid Bath use. It remains the only device to offer six modes of calibration.

### Isotech Dry Block Range - expanded and upgraded

- New Rugged Lightweight Outer Cases
- Custom moulded components brings lighter and stronger Portable Calibrators
- New ADVANCED model - more features than ever before

**The ADVANCED Models include automatic temperature cycling which saves time and money with the calibrator automatically logging data over a series of calibration points**

The company is always willing to give technical advice and assistance where appropriate.

Equally because of the programme of continual development and improvement, we reserve the right to amend or alter characteristics and design without prior notice.

# Isotech 4000 Series

## Available in three different versions

Isotech calibrators are available in three different versions; they all feature the same rugged casing with award winning calibration volumes. The range of features varies with the ADVANCED offering extra performance in terms of resolution and temperature stability. All models have common block sizes, interchangeable options and benefits providing calibration volumes with superior temperature uniformity and capacity for industrial probes.

Choose to suit your application:

MODEL

### BASIC

#### ■ Features

- Calibrate the entire loop by using a heat source rather than an electrical simulator, a test instrument and sensor can be calibrated as a system
- Simple To Use and Outstanding Value
- Rugged Case
- Calibrate all Sensor Types
- Ramp to Set Temperature
- Supply Voltage Power Correction and Digital Filtering
- PC Interface and Software

MODEL

### SITE

#### ■ Features

*As Basic but adds independent temperature indicator for reference probe*

- Accepts Platinum Resistance Thermometers, Process Inputs Including 4 - 20mA, Thermocouples including Types K,N,R,S,L,PL2,T,J and E.
- Thermostat Testing, Stand Alone or with PC
- Configurable Units °C, °F or K

**MODEL**

# ADVANCED

### ■ Best performance

- Benefit from advanced temperature controller that provides best performance
- Resolution to 0.001°C - Superior Stability
- Control parameters automatically optimised with temperature

### ■ View easily in all conditions

- Large Bright Colour Display
- Similar to Smartphone
- Crystal clear display with full colour graphics

### ■ Thermostat testing

- Test Two Thermostats Simultaneously

### ■ View from anywhere

- 21st Century Connectivity with Ethernet and inbuilt webserver
- Connect to the network and view the calibrator from anywhere, on your Notepad, Tablet or Smartphone

### ■ Save time and money

#### AUTOMATIC TEMPERATURE CYCLING

- Program the ADVANCED with the temperature points you need, store commonly used ranges. The calibrator can then automatically follow these points and log your data

### ■ Safely store and secure all the data you need

- Massive Internal Memory can safely store all your data
- Store a lifetime of data on a USB Drive
- Choose Open CSV Files or Tamper Proof Data with Secure File Format for Data Security

### ■ Supports five languages

- English, French, German, Italian and Spanish
- Simple to use with clear user interface

### ■ Connect more probes

#### UP TO 3 INPUT CHANNELS

- Inbuilt reference system with two universal inputs for PRT, Thermocouple or Process Input and a third thermocouple input
- Input types: Process Inputs including 4-20mA, PRT, and Thermocouple Types B, C, D, E, J, K, L, N, R, S, T, U

### ■ Offset elimination

- Connect a reference probe to one of the external probe inputs and the calibrator can trim the block temperature to remove offsets
- Block adjusted to reference probe value
- Remove offsets
- Use in combination with automatic cycling

### ■ The software you need

- PC tools for reviewing data with support for secure file format, managing temperature programs, easy configuration and data logging.

# Introduction: 4000 Series

The 4000 series includes the Isocal-6 multifunction calibration system

The award winning ISOCAL-6 consists of a range of temperature calibrators designed to calibrate all temperature sensors. As a multi function temperature calibrator it can be used as a Dry Block with accessories added to allow use as a Stirred Liquid Bath, a Blackbody Source, a Surface Temperature Calibrator, an ITS-90 Fixed Point System and for low temperatures a Stirred Ice Bath.

The ISOCAL-6 is a complete temperature calibration laboratory in a simple easy to use package.

A system designed to expand with you, to fulfill all future calibration needs. Giving the flexibility to add accessories when needed and meet current budgetary demands.

1

## Metal Block Bath

A Metal Block Bath, (Dry Block Calibrator) provides fast and clean calibration of thermocouples, PRTs and other industrial temperature sensors. Isotech blocks use a combination of multi zone and advanced materials technology to ensure constant temperature zones to enable high accuracy calibration. Interchangeable 35mm diameter blocks allow several sensors to be calibrated simultaneously with fast heat up and cool down. For larger probes blocks are available up to 65mm diameter and with immersion depth of up to 300mm. An unmatched combination of leading performance and calibration capacity.

2

## Stirred Liquid Bath

Remove the metal block and the Isocal-6 can be converted to a stirred liquid bath. Liquid bath operation allows angled or awkward shaped probes to be calibrated. Accuracies are improved over Dry Blocks alone and with a suitable reference probe performance of 0.005°C is achievable. In stirred liquid bath mode a reference probe should be used.

3

## Stirred Ice / Water Bath

The ISOCAL-6 models that operate below 0°C can be used to provide a 0°C stirred ice / water bath. This provides a simple low cost way of checking that standards have not drifted in between calibrations.

# 4

## Blackbody Source

Adding the blackbody target allows the testing of infrared thermometers. Low cost non-contact IR thermometers are increasingly being used in industry and the ISOCAL-6 is ideal to test and check these devices. The IR thermometer is focused on the target and compared to a reference probe in the block pocket.

# 5

## Surface Sensor Calibrator

With the Surface Sensor Kit the test sensor is compared to a platinum resistance thermometer located just below the surface of the block. Again save the cost of buying additional equipment by adding accessories as required to expand the ISOCAL-6 for new calibration applications.

# 6

## ITS-90 Fixed Point Apparatus

For the best possible performance with uncertainties to 0.0005°C (0.5mK) add an ITS-90 Fixed Point Cell. The most popular is the B8 Water Triple Point Cell, it is surprisingly affordable and simple to use - the triple point can be both created and maintained in the apparatus without the need for any other equipment or supplies.

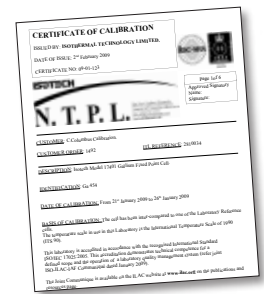

# 4000 Series

## Calibration Options

Isotech's UKAS accredited calibration laboratory was established in 1980 and has grown to be a full scale laboratory providing calibration to the smallest of uncertainties. Isotech certificates are formally recognised in over 70 countries and carry the ILAC-MRA logo.

We can provide different certificates, reporting the temperature only (UKAS-TEMP), additionally we can include the inbuilt temperature indicator channels calibrating by electrical simulation, (UKAS-SYST) or we can just calibrate the input channels (UKAS-SIM).

The following Calibration Options are Available		Code
BASIC, SITE and ADVANCED	5 point calibration for block temperature; includes reference probe values when ordered with Site or ADVANCED	UKAS-TEMP
ADVANCED	5 point calibration for block temperature and reference probe (when ordered) and electrical simulation of indicator	UKAS-SYST
ADVANCED	Calibration of input channels, electrical simulation only	UKAS-SIM

## Included Software

Model	Software	Connection
BASIC and SITE	<b>Cal Notepad and I-Cal Easy LOG:</b> Log and Monitor Calibrator	Serial
ADVANCED	<b>I-Cal Easy LOG:</b> Log and Monitor Calibrator	Ethernet
ADVANCED	<b>Review Lite:</b> Manage Log Data, supports secure data format	Ethernet
ADVANCED	<b>Set Point Program Editor:</b> Manage ADVANCED set point programs	Ethernet
ADVANCED	<b>Isotech ADVANCED Block Configuration Utility:</b> Fast configuration from a PC	Ethernet

Download: <http://www.isotech.co.uk/downloads>

## Industry Leading Instrumentation

- World Class Control and Data Security
- Better Performance
- Better Control Algorithm

The ADVANCED models include features specifically designed for Isotech Portable Calibrators by Eurotherm. Eurotherm invested 15 man years of effort in the two million GBP development of the nanodac controller, building on their 40+ years of experience in precision temperature control. The combination of Eurotherm, a world leader in temperature control and Isotech, a world leader in temperature metrology, deliver an unmatched combination of innovation, reliability and excellence.

# Temperature Cycling and Logging

## Features of the ADVANCED models

### Automatic Temperature Cycling

- Save Time
- Save Money
- Store up to 100 Programs

Calibration temperatures and dwell times can be combined into 'programs' for the ADVANCED calibrator to follow, up to 100 programs can be stored, with each program having up to 25 segments.

Programs can be edited from the front panel or on a PC with Set Point Program Editor.

As the program runs all measurements are recorded to the large internal memory.

Automatic temperature cycling saves time and money with the calibrator automatically logging data over a series of calibration points

### Data Logging

- Large Internal Memory to Store Your Data
- Creates CSV Files For Spreadsheets
- Creates Secure Tamper Proof Data to aid compliance to standards

The ADVANCED models log data to internal memory, the data is logged in a CSV format that can readily be opened and edited.

Data is also recorded in a secure tamper proof format as a binary 'UUH File'. These files can be opened with Review Lite software – download from our website. If the records

are found to have been tampered with then Review Lite will reject the record as corrupt.

Data files can be shared automatically across the network via FTP, transferred manually via USB or 'pulled' into Review's database.

For users working in regulated industries these features, when used in conjunction with company procedures and other equipment or process, aids compliance to standards such as FDA 21 CFR 11 and AMS2750E.

# ISOCAL - 6 Range Hyperion • Drago

- Multi Function: Six Modes including Dry Block and Liquid Bath
- 65mm Volume: Ideal Liquid Bath
- Calibrate entire measurement loop - using a heat source rather than an electrical simulator, a test instrument and sensor can be calibrated as a system

The Hyperion and Drago have large calibration volumes, 65mm x 160mm deep, which makes them ideal to use as portable liquid baths. Stirred liquid baths are suitable for temperature sensors of all types, sizes and shapes. Liquid Baths can provide smaller calibration uncertainties than dry blocks and when used with suitable reference thermometers, accuracies of up to 0.005°C can be achieved.

These models are part of the award winning Isocal-6 family and with a reference probe can be used with different accessories for Dry Block, Infrared, Surface Calibration and even with ITS-90 Fixed Point Cells for uncertainties to 0.001°C. In Dry Block Mode, the large 65mm diameter block allows for the calibration of either larger probes or for calibrating many sensors simultaneously.

As a Liquid bath the sensors can be placed directly into the stirred liquid thus avoiding the need for specially drilled blocks. If the liquid is directly in the block then the controller only model, or Basic (B) model, can be selected. However, instead of putting liquids directly in the block liquid containers can be used to facilitate rapid change of fluids. For greater accuracy, or when using a liquid container, Dry Block Insert, Blackbody Target or the Surface Sensor Kit a separate reference thermometer should be used to compensate for the varying offset between the controller and the accessory temperature.

An ideal arrangement would be to include the handheld Isotech TTI-10 or the bench top Isotech milliK Precision Thermometer and Model 935-14-16 Semi Standard Platinum Resistance Thermometer.

<http://www.isotech.co.uk/industrial/>

Alternatively the SITE or ADVANCED model can be selected; the SITE includes a temperature indicator for a reference probe. The ADVANCED also includes inputs for test thermometers, automatic temperature cycling, logging and additional sophisticated features.

All models include I-Cal Easy LOG software and the ADVANCED models additionally include software to manage logged data and configure the unit, see page 8 for more details.

*Baths*  
**SIX FUNCTIONS**

## Hyperion / Drago Accessories

**Dry Block Mode with Inserts**  
**936-06-01a** Standard Insert is: 8 x 8mm + 2 x 4.5mm all 157mm Deep. All Inserts have a 4mm tapped hole to suit supplied extractor tool.

**Alternative Inserts**  
**936-06-01b** Blank Insert  
**936-06-01c** Special Insert.

**Stirred Liquid Mode with Liquid Container Kit 936-06-02**  
 Allows liquid bath use, includes container, magnetic stirrer, probe guide and sealing cap.

**Stirred Ice Bath Mode with Liquid Container Kit**  
 Uses same liquid kit to provide 0°C reference as a stirred ice bath.

**Thermometer Support Kit 936-06-08**  
 Supports up to eight thermometers into liquid. Suits probes 5mm - 8mm in diameter.  
**936-06-07** C10 Oil -35°C – 140°C 1L  
**580-06-09** C20 Oil 20°C – 200°C 1L  
**915/09** VH Oil 150°C – 250°C 1L

**Infrared Calibration Mode with Blackbody Target 936-06-03**  
 Use optional Probe 936-14-61DB.

**Surface Sensor Calibration with Surface Sensor Kit 936-06-04**  
 Includes an Insert and an angled platinum resistance thermometer.

**ITS-90 Fixed Point Cells**  
**B8** Water Triple Point Cell (Hyperion)  
**17401** Slim Gallium Slim Cell  
**936-06-09** Cell Holder Assembly

**Calibration**  
 Includes three point traceable calibration certificate for block temperature  
**UKAS Calibration**  
 UKAS Calibration available to order, legally traceable in more than 70 countries.

**Standard Probe 935-14-61/DB**  
 Platinum Resistance Thermometer. 4mm diameter.

**Current Loop Interface 935-06-161**  
 24VDC Power Supply and Terminal Box. Powers 4-20mA Current Transmitters with 4mm terminal posts for easy connection.

**Carrying Case 931-22-112**  
 Sturdy case with room for accessories. Features wheels and pull out handle.

# Isocal-6 Performance and Use

### Hyperion Performance - Dry Block

### Drago Performance - Dry Block

- Audit Calibration (Similar Sensors) S model with UKAS option
- Radial Homogeneity

See Evaluation Reports for full details  
<http://www.isotech.co.uk>

## Alternative Methods of Calibrating with an Isocal-6

### ADVANCED Model

- Digital Display of Set and Nominal Block Temperature
- Inbuilt three channel indicator for reference probe and units under test
- Advanced features including automatic Temperature Cycling and Logging
- Best Practice calibration with established traceability and uncertainty

### SITE Model

- Digital Display of Set and Nominal Block Temperature
- Inbuilt single channel indicator for reference probe
- Best Practice calibration with established traceability and uncertainty

### BASIC Model

- For Quick and Easy Testing
- Digital Display of Set and Nominal Block Temperature
- Use with a separate external indicator to compensate for gradients and loading

UKAS Calibration available for these systems - *International Traceability - Best Practice* See page 8

# ISOCAL - 6 Range Europa Venus Calisto

- Multi Function: Six Modes including Dry Block and Liquid Bath
- Fast Response 35mm x 160mm Calibration Volume
- Calibrate Whole Measurement Loop

These models will calibrate temperature probes from -45°C to 250°C with unrivalled flexibility. As a traditional Dry Block, several thermometers can be quickly calibrated.

Accessories are available to convert to a stirred liquid bath, for surface sensor calibration, to calibrate infrared thermometers and even to use as an ITS-90 Fixed Point System with calibration uncertainties as small as 0.0005°C. With excellent stability and distributed heating cooling zones for good uniformity these calibrators offer proven thermal performance.

These award winning calibrators are easy to use and are available in three versions – the Basic, the Site and the ADVANCED. The Basic has a digital display of set and nominal temperature, the Site additionally includes an in-built independent temperature indicator for a reference probe. The ADVANCED controller has inputs for reference and test thermometers with a further range of sophisticated features including automatic temperature cycling, secure data logging and full colour high resolution display.

All models include I-Cal Easy LOG software and the ADVANCED models additionally include software to manage logged data and configure the unit, see page 8 for more details.

These models meet the calibration capacity requirements of EURAMET/cg-13/v.01, “EA Guidelines on the Calibration of Temperature Block Calibrators, formerly EA10/13. accuracy and best performance.

### Alternative Inserts

**951-06-07** Alternative Insert type B 13mm, 10mm, 8mm, 5mm and 3.5mm dia. holes, all 157mm deep

**951-06-08** Alternative Insert type C 8mm, 6 x 6.5mm dia. holes, all 157mm deep

**951-02-15a** Blank Insert without pockets for local machining. Includes M4 tapped hole for supplied extractor tool.

**951-02-15c** Custom insert. Isotech can provide custom drilled pockets, minimum of 3mm separation between holes.

Contact Isotech with your requirements

### Stirred Liquid Mode with Liquid Container Kit 951-06-01

Allows liquid bath use, includes container, magnetic stirrer, probe guide and sealing cap.

### Stirred Ice Bath Mode with Liquid Container Kit

Uses same liquid kit to provide 0°C reference as a stirred ice bath (Not Calisto)

### Thermometer Support Kit 921-02-06

Allows three thermometers to be suspended in the bath, including liquid in glass types.

<b>520-05-01</b>	C10 Oil	-35°C – 140°C	0.1L
<b>951-06-06</b>	C20 Oil	20°C – 200°C	0.1L
<b>953-04-01</b>	VH Oil	150°C – 250°C	0.1L

### Infrared Calibration Mode with Blackbody Target 951-06-04

Use optional Probe **934-14-82/DB** placed in the auxiliary block pocket for use as a reference.

### Surface Sensor Calibration with Surface Sensor Kit 951-06-02

Includes angled platinum resistance thermometer.

### ITS-90 Fixed Point Cells 17724M

Slim Mercury Cell (Europa Only).

**B8** Water Triple Point Cell (Venus and Europa)

**17401M** Slim Gallium Cell (Europa, Venus and Calisto)

### Standard Probe 935-14-82/DB

Platinum Resistance Thermometer. Probe diameter 4mm, recommended pocket size 4.5mm. Angled head feature avoids sensors in block.

### Current Loop Interface 935-06-161

24VDC Power Supply and Terminal Box. Powers 4-20mA Current Transmitters with 4mm terminal posts for easy connection.

### Carrying Case 931-22-111

Sturdy case with room for accessories. Features wheels and pull out handle.

# Isocal-6 Performance and Use

### Venus and Europa

### Calisto

- Uncertainty with Reference Probe with optional UKAS Calibration
- Audit Calibration: Method comparing a PRT to UKAS Calibrated model
- Radial Homogeneity. Use for similar probes and external indicator

See Evaluation Reports for full details  
<http://www.isotech.co.uk>

## Alternative Methods of Calibrating with an Isocal-6

### ADVANCED Model

- Digital Display of Set and Nominal Block Temperature
- Inbuilt three channel indicator for reference probe and units under test
- Advanced features including automatic Temperature Cycling and Logging
- Best Practice calibration with established traceability and uncertainty

### SITE Model

- Digital Display of Set and Nominal Block Temperature
- Inbuilt single channel indicator for reference probe
- Best Practice calibration with established traceability and uncertainty

### BASIC Model

- For Quick and Easy Testing
- Digital Display of Set and Nominal Block Temperature
- Use with a separate external indicator to compensate for gradients and loading

UKAS Calibration available for these systems - *International Traceability - Best Practice* See page 8

The world's leading National Metrology Institutes choose Isotech - *shouldn't you?*

# A Guide to Portable Calibration

Isothermal Technology manufacture a full range of temperature calibration equipment from Primary Standards used in National and Primary Laboratories, for Secondary Laboratory Equipment used in accredited calibration laboratories and through to the Dry Blocks featured here.

We have been pioneering the latest developments in Temperature Metrology for more than 30 years, benefit from our know how, experience and global network.

### Four Zones for Optimal Uniformity

Isotech blocks with active heating and cooling feature specially designed thermoelectric heat pumps positioned in four heating / cooling zones around the block to ensure good uniformity for high accuracy calibration.

### Excellent Stability

The ADVANCED models automatically compensate for power fluctuations and feature advanced PID algorithms with digital filtering to deliver world class control and superior stability.

### High Temperature Uniformity

The Jupiter ADVANCED calibration block features uniform heating with a custom wound heater over an extended length of the block. The block itself is made from copper which has a very high thermal conductivity; much superior to the aluminium bronze alloys used elsewhere. A propriety process is used to protect the copper from oxidising. This combination of materials and expert knowledge delivers superior performance.

### High Accuracy Reference Probes

The Jupiter ADVANCED operates to a maximum of 660°C; matched to the upper limit of our high temperature Semi Standard Platinum Resistance Thermometers. This allows maximum accuracy with no risk of exceeding the temperature limit of the PRT.

### Optimised Furnace

The Pegasus ADVANCED features a small tube furnace to allow operation to 1200°C in a portable case. With a ceramic furnace construction temperature gradients are larger than with lower temperature metal blocks.

The Isotech furnace benefits over other designs by using a specially wound furnace tube assembly. They are manufactured in our factory with the turns concentrated at the ends of the furnace, where the heat losses are greatest. This gives an improved temperature profile and lower uncertainty.

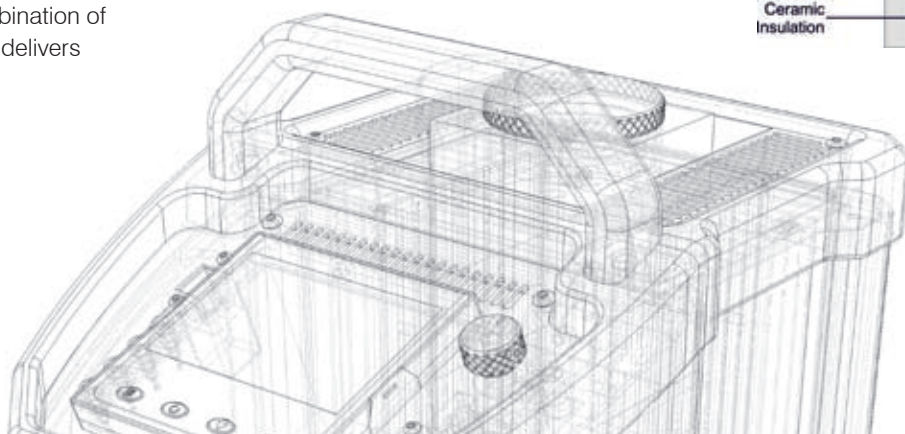

Insulators are provided for the top and bottom of the furnace which further improve temperature uniformity.

Four distributed heat/cooling zones for optimum uniformity

Superior uniformity by using copper block with extended length heating

# Using Isotech's Dry Blocks Traceable Calibration

For best practice the recommendation is that a calibrated probe is placed into the Dry Block Insert and the thermometers under test "can be related to appropriate standards, generally international or national standards, through an unbroken chain of comparisons". Thus meeting many quality systems including the requirements of ISO 9000.

Using the Dry Block itself as the Reference (or standard) raises a number of issues, such as how is the uncertainty of the Dry Block calculated. In practice it can vary significantly and there are some poor designs from many suppliers where it is not possible to achieve this in a satisfactory manner. Recently, International Guidelines have been published from EURAMET that give guidance, and requirements, for the calibration of Dry Blocks EURAMET/cg-13/v.01 (formerly EA10-13). For the most demanding applications we continue to recommend that a reference probe is used, the same method as used in secondary temperature laboratories, but for less demanding calibration, and the quick testing of sensors the Dry Block can be used without a reference probe, refer to the Dry Block's Evaluation Report for typical performance.

## Dry Block pre-purchase check list

- 1 Does the supplier have an accredited laboratory?**  
*UKAS accreditation, "the means by which, in the public interest, the integrity and competence of independent evaluators is confirmed and declared". Isotech can issue a UKAS certificate with the performance expressed in the manner that you will need, not to some confusingly expressed specification that is made with no confirmation of integrity and competence.*
- 2 Experience**  
*Does the producer have experience? Do they understand the difference between accuracy and uncertainty? Can they tell you how to calculate the uncertainty of a probe being calibrated in the block? Isotech can.*
- 3 Expandable**  
*Can the Dry Block be used with other sensors? Are there accessories available for future expansion? With Isotech products they are.*
- 4 PC Support**  
*Can it be connected to a computer? Is there software available, can it be automated? Isotech Dry Block Calibrators have a range of software options.*
- 5 Documented**  
*Is the bath fully documented? Can you download a full evaluation report from the Web Site? Does it come with a comprehensive handbook and tutorial? Is training available? Isotech provide all of these free of charge.*
- 6 Practical**  
*Isotech Dry Blocks are practically designed with a strong metal case, and are a compact portable size. If you are going to carry it around don't forget to check the size and weights. It is surprising how large some other blocks are, even though they take the same number of probes. Beware if the specification does not include the weight.*
- 7 Value**  
*Check the prices, all the above come at an amazingly competitive price when you choose **Isotech**.*

### Dry Block Calibrator of Poor Design

### Dry Block Calibrator Meeting ISO9000 Requirements

# Dry Block Calibrator Jupiter

- Wide Operating Range to 660°C
- Fast Response
- Calibrate Whole Measurement Loop

The Jupiter Dry Block range offers industry-leading performance in an easy to use portable package - ideal for the calibration of thermocouples and platinum resistance thermometers. It has been designed for fast heating and cooling for convenient field use. For flexibility surface sensor and infrared thermometer accessories can be added.

The standard insert can hold up to six thermometers. For larger blocks see the Gemini range.

These award winning calibrators are easy to use and are available in three versions – the Basic, the Site and the ADVANCED. The Basic has a digital display of set and nominal temperature, the Site additionally includes an in-built independent temperature indicator for a reference probe. The ADVANCED controller has inputs for reference and test thermometers with a further range of sophisticated features including automatic temperature cycling, secure data logging and full colour high resolution display.

Isotech is a world leader in temperature calibration, providing many nations with their Primary Standards and operates a full scale UKAS accredited calibration laboratory. We can offer a range of calibration options to meet your requirements.

Benefit from our experience and understanding in calibration at all levels, our evaluation reports, our tutorials and uncertainty calculations.

These models meet the calibration capacity requirements of EURAMET/cg-13/v.01, "EA Guidelines on the Calibration of Temperature Block Calibrators, formerly EA10/13.

All models include I-Cal Easy LOG software and the

<http://www.isotech.co.uk/industrial/>

ADVANCED models additionally include software to manage logged data and configure the unit, see page 8 for more details.

# Dry Blocks

## FAST RESPONSE

### Metal Block Bath

The Jupiter is supplied with an insert suitable for a wide range of sensors as standard.

### Blackbody Source

Add the Blackbody accessory to allow calibration of infrared thermometers.

### Surface Sensor Calibrator

The Jupiter can calibrate surface sensors by adding the surface sensor kit.

## Jupiter Accessories

### Metal Block Insert 852-07-11

Standard Insert included.  
Size: 2 x 4.5mm, 2 x 6.4mm, 1 x 8mm and 1 x 9.5mm all 140mm deep

### Alternative Inserts

**852-09-03** Alternative Insert type B 13mm, 10mm, 8mm, 5mm and 3.5mm diameter holes, all 140mm deep

**852-09-04** Alternative Insert type C 8mm, 6 x 6.5mm diameter holes, all 140mm deep

**852-07-07** Blank Insert without pockets for local machining. Includes M4 tapped hole for supplied extractor tool.

**852-07-07C** Custom Insert. Isotech can provide custom drilled pockets, minimum of 3mm separation between holes. Contact Isotech with your requirements.

### Blackbody Kit 852-09-05

Includes a Blackbody target and Sensor.

### Surface Sensor Kit 852-07-15

Includes angled thermocouple.

### Calibration

Includes three point traceable calibration certificate for block temperature

### UKAS Calibration

Recommended: Options for block temperature and reference thermometer inputs (simulation). Legally traceable in more than 70 countries.

### Air Cooling 853-04-02

For use with an air supply this accessory allows air to be blown into the block for rapid cooling.

### Standard Probe 935-14-72/DB

Platinum Resistance Thermometer for use up to 660°C. Probe diameter 6mm, recommended pocket size 6.5mm.

### Current Loop Interface 935-06-161

24VDC Power Supply and Terminal Box. Powers 4-20mA Current Transmitters with 4mm terminal posts for easy connection.

### Carrying Case 931-22-111

Sturdy case with room for accessories. Features wheels and pull out handle.

# The world's leading National Metrology Institutes choose Isotech - shouldn't you?

**Isotech manufacture the widest range of temperature calibration equipment from hand held thermometers to Primary Standards. With Isotech solutions you can expand your equipment no matter what the requirement.**

Isotech have been pioneering the latest developments in Temperature Metrology for more than 30 years, benefit from our know how, experience and global network.

## Jupiter Benefits

- The Jupiter calibration block features uniform heating with a custom wound heater over an extended length of the block. The block itself is made from copper which has a very high thermal conductivity; much

superior to the aluminium bronze alloys used elsewhere. A propriety process is used to protect the copper from oxidising. This combination of materials and expert knowledge delivers superior performance.

## 660°C Operation

- The Jupiter ADVANCED operates to a maximum of 660°C; matched to the upper limit of the high temperature Isotech Semi Standard Platinum Resistance Thermometers. This allows maximum accuracy with no risk to exceeding the temperature limit of the PRT. This gives greater accuracy than extending the range beyond 660°C and having to use an inferior thermometer or thermocouple.

*Superior uniformity by using copper block with extended length heating*

# Dry Block Calibrator Gemini

- Calibrate Large Diameter Probes
- High Capacity Blocks 64 x 160mm
- Calibrate Whole Measurement Loop

The Gemini range of Dry Blocks have high capacity allowing a large number of probes to be calibrated together. They are also suitable to accept large diameter probes with the block volume of a nominal 64 x 160mm.

Whilst the large block takes longer to heat and cool than the Jupiter it can calibrate thermocouples, resistance thermometers, thermostats and sensors that are too large for the smaller blocks.

These award winning calibrators are easy to use and are available in three versions – the Basic, the Site and the ADVANCED. The Basic has a digital display of set and nominal temperature, the Site additionally includes an in-built independent temperature indicator for a reference probe. The ADVANCED controller has inputs for reference and test thermometers with a further range of sophisticated features including automatic temperature cycling, secure data logging and full colour high resolution display.

All models include I-Cal Easy LOG software and the ADVANCED models additionally include software to manage logged data and configure the unit, see page 8 for more details.

Available with a fixed block with four 8mm and four 19.5mm pockets or the LRI version which has a removable block. With the LRI model, blocks can be drilled to custom configurations.

Isotech is a world leader in temperature calibration, providing many nations with their Primary Standards and operates a full scale UKAS accredited calibration laboratory. We can offer a range of calibration options to meet your requirements.

<http://www.isotech.co.uk/industrial/>

# Dry Blocks

## LARGE VOLUME

### Gemini Fixed Block

Four 8mm Pockets  
Four 19.5mm Pockets

### Gemini LRI Removable Block

Eight 8mm Pockets  
Can be custom drilled

## Gemini Accessories

### Metal Block Sleeves

#### Gemini 550

Set of four Sleeves to suit the block.  
Optional single hole sizes 4, 6, 8, 10, 12, 14mm diameter all 150mm deep.

**857-07-01** Undrilled sleeves for local machining.

**857-07-03** 1 sleeve with 2 holes 4.5mm x 150mm deep.

#### Gemini 700

Set of four Sleeves to suit the block.  
Optional single hole sizes 4, 6, 8, 10, 12, 14mm diameter all 150mm deep.

**857-07-02** Blank sleeves for local machining.

**857-07-04** 1 sleeve with 2 holes 4.5mm x 150mm deep.

*Note: The use of sleeves will introduce an additional thermal gradient into the block. This can be avoided by using the LRI model with a block drilled for specific probes.*

### Removable Inserts

#### Gemini 550 LRI

**976-07-01a** Included as Standard Removable insert with eight 8mm pockets

**976-07-01b** Blank Insert

Insert without pockets for local machining

**976-07-01c** Custom Insert

Contact Isotech with your requirements

#### Gemini 700 LRI

- 2 - Supply Voltage:  
Specify either 115Vac 50/60hz or 230Vac 50/60Hz

# Dry Block Calibrator Pegasus

- High Temperature Thermocouple Calibration Furnace
- Custom Furnace Design with Optimised Profile
- Calibrate Whole Measurement Loop

The Pegasus range offers extreme high temperature calibration in an easy to use portable package - ideal for the calibration of high temperature thermocouples. It has been designed for fast heating and finds applications in the glass, electrical power, automotive and material processing industries.

A Blackbody target can be added for the calibration of infrared thermometers.

The standard insert has four 8mm pockets 80mm deep. The metal insert is strategically placed beneath 50mm of insulation to provide optimal performance over the radiant temperature range.

The optional Blackbody target is used with a specially angled Type R thermocouple that sits immediately behind the target area.

These award winning calibrators are easy to use and are available in three versions – the Basic, the Site and the ADVANCED. The Basic has a digital display of set and nominal temperature, the Site additionally includes an in-built independent temperature indicator for a reference probe. The ADVANCED controller has inputs for reference and test thermometers with a further range of sophisticated features including automatic temperature cycling, secure data logging and full colour high resolution display.

The B model should be used with an external reference probe and indicator, such as the milliK. The thermocouples

under test should be calibrated by comparison to the external probe.

All models include I-Cal Easy LOG software and the ADVANCED models additionally include software to manage logged data and configure the unit, see page 8 for more details.

# The world's leading National Metrology Institutes choose Isotech - shouldn't you?

## Pegasus Benefits

The Pegasus features a small tube furnace to allow operation to 1200°C in a portable case. With a ceramic furnace construction temperature gradients are larger than with lower temperature metal blocks.

The Isotech furnace benefits by using a specially wound furnace tube assembly. They are manufactured in our factory with the turns concentrated at the ends of the furnace, where the heat losses are greatest. This gives an

improved temperature profile and lower uncertainty.

Insulators are provided for the top and bottom of the furnace which further improve temperature uniformity.

The effective immersion depth is 130mm, 80mm in the metal insert and then a further 50mm in the furnace tube.

*Benefit from Isotech's design and experience*
